

POLISHING WITH

TWIST™ DIA for Zirconia

Fine gloss in 3 steps

THE EASIEST WAY TO CREATE NATURAL GLOSS

The innovative shape with the flexible polishing lamellae creates a natural gloss on all zirconia oxide restorations. No matter if the surfaces are level, convex or concave, the diamond-impregnated lamellae polishes them to a high-gloss level.

BENEFITS

- Flexible polishing twist for refining all types of tooth surfaces
- Highly suitable for occlusions
- Modellation of zirconia restoration is maintained
- Sterilizable and reusable
- Economic efficiency due to high durability and reusability
